EDUCATION

B.Sc. Computer Science

Lagos State University

04/2026

Second Class Honors Relevant Coursework: Algorithms & Data Structures, Computer Programming, Computer Architecture, Discrete Mathematics

SKILLS

Technical Skills

Languages

Python, SQL, VB.NET

Frameworks

Django, Django REST Framework

Tools

Git, Docker, AWS, Azure, Linux, Jenkins

Core Areas

Backend Development, API Design, Data Structures & Algorithms, OOP, SDLC

Soft Skills

Leadership, Problem-solving, Critical Thinking, Clear Communication

LEADERSHIP EXPERIENCE

Backend Developer

Ndara.ai

2025 – Present

- Developing backend features for a SaaS platform integrating WhatsApp APIs and AI-driven automation
- Designing and managing scalable APIs and system architecture
- Coordinating backend tasks and ensuring code quality across the team

Member

Computer Science Department

01/2024 – Present

- Supported academic coordination and tutorial planning
- Facilitated communication between students and department

CERTIFICATIONS

Harvard CS50

Strong foundation in algorithms, data structures, Python, SQL, and web development (HTML, CSS, JavaScript).

INTERESTS

Backend systems

AI-driven applications

Scalable architectures

Technology innovation

PROJECTS

Liftlink (RideShare Lagos) – P2P Ridesharing Backend

Production-ready Django REST backend for a peer-to-peer ridesharing platform, built around a trust-first wallet-escrow system.

- Built an atomic wallet-escrow payment flow (Paystack integration, database-locked bookings, automatic refunds) to prevent overbooking and secure funds
- Designed a full ride lifecycle with dynamic cancellation penalties, driver KYC verification, and real-time ratings/chat via Django Channels

Tech: Django, DRF, PostgreSQL, JWT, Paystack API, Django Channels

PrepHive – CBT Learning Platform

https://github.com/Anifowoseolamide/prephive_premium

Full-featured CBT platform enabling students to practice exams with real-time scoring.

- Built an interactive quiz engine with timer, auto-submission, and a progress-tracking dashboard
- Designed a resource system for downloading study materials

Tech: Django, PostgreSQL, Bootstrap, JavaScript

GeekSpace – Campus Information System

<https://github.com/Anifowoseolamide/Geekspace>

Scalable platform for managing campus announcements, resources, and communication.

- Designed a role-based system for students and administrators with search and filtering for content accessibility
- Implemented notification and resource management features

Tech: Django, Tailwind CSS, PostgreSQL

DineEase – Restaurant Management Website

<https://github.com/Anifowoseolamide/DineEase>

Modern restaurant platform with online reservations and dynamic menu management.

- Developed a booking system with validation, admin control, and a responsive UI with media gallery
- Designed a scalable backend for content and user interactions

Tech: Django, PostgreSQL, Bootstrap
